You should have:

- Strong background in computer use
- General foundation in electronics is strongly recommended

CompTIA A+ Exam Information

The CompTIA A+ certification exam was developed in 1993 at the request of the information technology (IT) industry. Major corporations needed a way to validate the skills of entry-level technicians and reduce the costs associated with hiring, recruiting and training employees. These corporations turned to CompTIA to lead the development of the A+ certification program.
