

Computer Service Repair

Toms River Center

1 Year Program
(A.M. Class Only)

Mr. Bill George

Computer repair technicians install, maintain and repair computer systems. Many technicians are employed by the manufacturers who make the equipment. They install a system by laying cables that run between the computer and the peripherals. They then test the system to make sure that it works properly, and set up a maintenance schedule.

Related Job Titles

Computer Repair Technician
Network Assistant
Computer Sales
Computer Cabling Technician

Skills You Will Learn
