Twilight Automotive Technology

Marco Esposito, Instructor

My career as an Auto Tech began in 1973. Having completed the General Motors Auto Training Program, I worked for a Chevrolet dealership & later opened my own shop. In 1983, my career as an Automotive Instructor began and I never looked back! 46 years in the industry, 36 years teaching, 23 at OCVTS...loving my job! Outside of school, I enjoy boating, riding my motorcycle, weight lifting and spending time with my granddaughter.

Future Auto Tech Success Stories...

Sharing Success Stories

Greetings from Ohio Technical College

Student's Name: Anthony Virgillito
OCVTS Program: Automotive Technology
Instructor: Frank Storholm

Class of: 2017
Center: Jackson
High School: Toms River North

In Anthony's own words: When I enrolled in the Automotive Technology Program at OCVTS, I just knew the basics of car repair such as brakes and oil changes. I spent two years in his Mr. Storholm's class. I earned good grades and completed the program. I noticed that like a ball of clay, Mr. Storholm shaped me into a better student and a better person with a bright future, both personally and mechanically.

Since I began the Automotive Technology Program, I always felt determined to continue my education. For a couple of years, I spent my free time looking for a career that I could see myself doing for years on end. I decided on Classic Car Restoration. I visited the campus of the Ohio Technical College in Cleveland, Ohio back in November of 2016. Quite honestly, I was impressed with the teachers and students alike. It was like no other college I visited. I was hooked.

My future goals are broken down into three parts. First, I want to buy my dream car, a 1967 Pontiac GTO. I fell in love with the car when I was younger and still love it today. Secondly, I want to build a business for myself, keeping the trade running throughout generations. My last goal is to share my love and passion for cars with my family.

In general, when it comes to schooling, some students prefer college, other students do not and that is fine. At the end of the day, remember anything is possible to accomplish. All it requires is hard work, keeping a level head, and staying focused. You can do it!

"Anthony Virgillito visited Ohio Technical College and took their entrance test. He scored the highest of anyone taking the program and won a full scholarship. He will be taking their Classic Car and Vintage Restoration Career Training Program in the fall. Anthony was an easy choice as a success story. Besides receiving a full ride to OTC, he has a real passion for cars and he is a hard worker," stated Frank Storholm, Instructor in the Automotive Technology Program at the Jackson Center.

Anthony was excited meeting the OTC recruiter and continuing his education.

Sharing Success Stories

Greetings from Jefferson University

Student's Name: Michaela Day
OCVTS Program: Fashion Design and Merchandising
Instructor: Carey Brown

Class of: 2018
Center: Brick
High School: Brick Memorial

In Michaela's own words: OCVTS helped me gain the knowledge I needed to create a portfolio for colleges. It taught me what colleges were looking for, how to improve my resume in related English, and how to improve my image to potential employers. OCVTS has also offered many competitive opportunities to display my skills such as the Family, Career and Community Leaders of America (FCCLA), where I won numerous scholarships to a variety of colleges. At OCVTS, students are encouraged to apply and win scholarships because they believe your grades are important, but it is not all you are.

Jefferson University is where I am continuing my education in Fashion Design. I am attending on a Full Tuition Design Scholarship for all four years. I won this scholarship with my portfolio and YouTube video on how fashion designers improve people's lives. Vocational school taught me how to make a good portfolio and they educated me about the industry for my video. OCVTS helped me achieve this once in a lifetime prize. My future goals are to become a fashion designer and to improve the environment through my innovative fashion designs. I was inspired by the eco-fashion education I received at OCVTS and now it is my career path.

I would recommend Carey Brown and the Fashion Design and Merchandising class to anyone who is considering being a part of the fashion industry. Whether it be business, design, or styling, this course will help you choose your path and it will help you develop the skills needed to succeed. I started out with little knowledge of sewing, drawing, and fashion marketing but OCVTS will help you stand out amongst other college applicants. I already referred two friends to the program and they were just as impressed as I was. Thank you, OCVTS!

With an over-the-moon enthusiasm, Carey Brown nominated Michaela as an OCVTS success story. "Michaela participated in a portfolio competition and received a full scholarship to Jefferson University (my alma mater formerly known as Philadelphia University.) She also competed at FCCLA and made her way to Nationals in Atlanta, Georgia. She earned a gold medal for her project! Additionally, Michaela was my "Outstanding Student" for this past 2017-18 school year. She will do very well at Jefferson University, and more importantly, she will love it!

(Left) Michaela's first full garment made in Fashion Design at OCVTS, which received a perfect score and earned her numerous scholarships at FCCLA. (Right) Carey Brown, Michaela and her parents are all smiles at the Jefferson University Centennial Educator's Award Ceremony. Michaela nominated Carey Brown for this prestigious award with a beautiful essay and she won!

Sharing Success Stories

Own Your Own Business

Student's Name: Patrick Erbe
OCVTS Program: Construction Technology
Instructor: Ray Gudzak
Name of Business: Erbe Builders, Inc., Toms River, NJ
Website: www.erbebuilders.net

Class of: 1987
Center: Toms River
High School: Toms River North
Years in Business: 20+

In Patrick's own words: In my junior and senior years of school, I was a shared time student. I attended Toms River High School North and the Toms River Center of OCVTS in the Construction Trades Program. I wanted to learn as much as possible about all phases of the construction trades industry, focusing on the importance of getting things done properly. I would like to extend a heartfelt thank you to Ray Gudzak for teaching me a good deal of the basics so that when I went out into the field I knew why you were doing things a certain way. My success and long career would not have been possible if not for the exemplary training I received from the faculty and staff at OCVTS

Looking back, I guess you could call me a workaholic, even at a young age. I worked part-time while in high school and full-time in the summers. I worked hard and saved my money. After graduation, I began by buying my first home, renovating and selling it, and repeated the process all the while saving my money. Then I started to purchase land, both residential and commercial, and began development. Owning your own business means working long hours but the hard work pays off. Then you get to a point in your life when you can give back to the community in different ways.

To the future graduates of the construction trades, I would say never be afraid to put yourself out there. There is no harm in asking questions. Always try to do the right thing. Be on time and learn as much as you can if someone is willing to teach you and always be willing to help others.

"Erbe Builders is based right here in Toms River and employs a staff of 12 full-timers. Driving around Ocean County you will see many of his beautiful homes including a couple of new subdivisions. Patrick was a recipient of our Acknowledging Excellence Award not for what he learned at OCVTS, but for what he has accomplished since graduating. Both Erbe Builders and his family have an altruistic mind-set. They are strong supporters of the J. Phillip Citta Regional Cancer Center, Ocean County College Foundation, Harbor House, YMCA, Toms River Rotary and OCVTS. Congratulations Patrick on being a true success story," commented Christine Karaska, Job Services Coordinator.

"Whether you are looking to build your dream home, renovate your current residence, add a deck or a 2nd floor our qualified craftsmen can turn your dream into reality," retrieved from their website at www.erbebuilders.net.

Sharing Success Stories

Own Your Own Business

Student's Name: Brian Hahner

OCVTS Program: Electrical Trades

Instructor: Mr. Cannon

Business Name: Hahner Electrical Services, Point Pleasant, NJ

Class of: 1995

Center: Jackson

High School: Point Pleasant Borough

In Brian's own words: In high school, I will admit to being a poor student with no direction or drive. My grades were not good and my attitude was terrible. This might sound sad, but there is a happy ending. In the mail, my family received a pamphlet from the Ocean County Vocational Technical School. After reading about the Electrical Trades Program, I decided to sign up because it "sparked" my interest. Working with my hands and my mind in a program that I enjoyed gave me confidence. It was that confidence that I needed to grow up and thrive, not just survive as a student but also as a person. Honestly, thanks to this program, I made it to graduation and my future looked bright. Now, I am pleased to say for thirteen years, I have been working in the electrical trades industry and truly love what I do!

As a business owner, I do have some basic suggestions to anyone trying to secure and keep a job in the trades: look professional, tie your boots, tuck in your shirt, shave, shower and do not smoke! Be prepared every day with your tools, your lunch and dress for the weather. Show up on time, which means ten minutes early. Treat everyone with respect. If you pick a trade that you enjoy, you may find out that being tired and dirty is very rewarding!

Tom Allen, Electrical Trades Instructor at the Jackson Center, submitted Brian's name. He stated, "Brian Hahner has been a successful electrical contractor for approximately 13 years. His electric installations are superior to all of his peers'. In September, Brian began working as an instructor at the Toms River Center. Currently, he is teaching an Introduction to Electricity class for novices. I am sure that he is a great addition to the team of electric instructors working at Adult Education."

Brian Hahner, proud owner of Brain Hahner Electrical Services, LLC and electrical instructor at OCVTS.

Sharing Success Stories

Working in the Field

Student's Name: Mustafa Amer

OCVTS Program: Automotive Technology

Instructor: Jerry Salvatore

Employer: Eppy's Automotive Center, Toms River, NJ

Class of: 2004

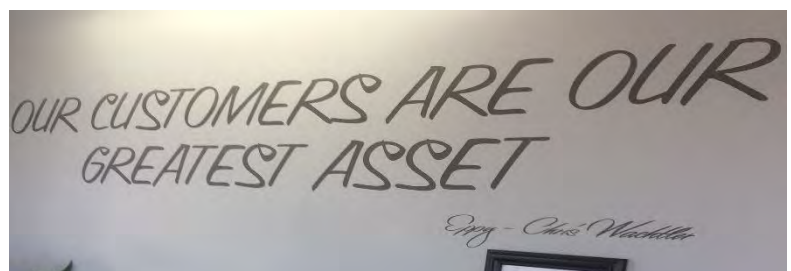

Center: Toms River

High School: Toms River North

In Mustafa's own words: In high school, I did not have any career path, nor did I have a passion in a specific field, I decided to enroll in the Automotive Technology Program at OCVTS because it was available. That turned out to be one of the best decisions I have ever made. It was in that program I learned the fundamentals of auto repair as well as auto diesel. As a student, I looked forward to going to school every day because I was gaining knowledge in something that I was interested in and that is becoming an automotive mechanic. The auto repair skills that I learned at OCVTS best prepared me to work in the field, to earn a livable wage and enjoy my job. Let me repeat that, earn a livable wage and enjoy my job. I have been working as automotive mechanic at Eppy's Automotive Center for fifteen years!

Driving to Seaside Heights, Eppy's Automotive Center is somewhat of a landmark on Route 37 East in Toms River, having been there for thirty-five years. Epifanio (Eppy) Wachtler, the owner prides himself on starting and staying in business for over three decades. When asked what can he attribute the longevity of his small family business, Eppy credited his skilled mechanics and quoted the phrase painted on his office wall, "Our customers are our greatest asset."

One of Mustafa's happy customers nominated him as a success story. She wanted to thank him for keeping her Honda on the road for over fifteen years with 202,000 miles on the odometer and still going strong!

Mustafa Amer (pictured above) at work at Eppy's Automotive Center either repairing your car or selling you a reliable used one. To students in the auto field, he reminds you "The more you learn, the more you will earn!"

Sharing Success Stories

Working in the Field

Student's Name: Tyler Nicoll
OCVTS Program: Automotive Technology
Instructor: Jay Houle
Employer: Pine Belt Nissan, Toms River, NJ

Class of: 2013
Center: Brick
High School: Toms River North
Website: www.Nissan37.com

In Tyler's own words: First, let me begin by thanking Mr. Biscardi for the honor of selecting me as an OCVTS success story. I wanted to attend OCVTS because I knew college was not for me. Their Adult Education's Auto Technology program is the class I chose. I enjoy working on cars and trucks. I also enjoy meeting new people. The auto industry is always changing and you need to keep up on the latest technology. This will give me the opportunity to continue to learn new skills. Speaking of skills, Mr. Houle taught us the best skill to develop is paying attention to details. If you take something apart, you need to know how to put it back together. My father has worked in the automotive industry for many years and he has been very successful. I am proud to be following his example.

John Biscardi, the Principal at MATES, nominated Tyler stating, "Tyler Nicoll was a student in the Brick Center Automotive Technology program from 2011 to 2013. At that time, I was the Brick Center VP, and the district automotive supervisor. Tyler was a hard working student who had a passion for working on cars. He was a team player and always made an effort to assist other students in his class. All of my interactions with Tyler were positive and he always put forth a strong effort in everything he did while in this class." Jay Houle, Tyler's instructor, concurs with John's comments, adding, "Tyler was an all-around great kid, an honor roll student that displayed a genuine enthusiasm for the auto tech industry. I am so pleased to hear that he is working at a fine dealership."

(Photos) Tyler gladly poses for photos at his job as a technician at Pine Belt Nissan. Looks like all his training has served him well...and he is wearing his safety glasses! (photo below) Tyler's dad and mentor who along with his mom are proud of their son's success. Like father, like son!

Sharing Success Stories

Working in the Field

Student's Name: Romario Garcia Varela
OCVTS Program: Architectural Engineering and Design
Instructor: Kirk Goebel
Employer: Clearpoint Services, LLC., Jackson, NJ

Class of: 2016
Center: Brick
High School: Toms River South

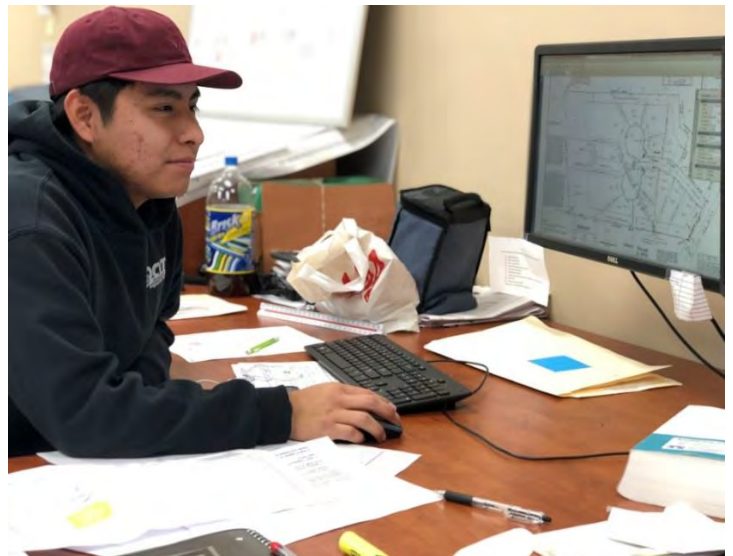

In Romario's own words: When growing up, I always had an interest in designing and creating projects. I decided to attend OCVTS to help me explore my interests, learn new skills and embrace my passion. I am happy to say that was a good decision. Mr. Goebel taught me how to create objects using AutoCAD and Inventor, and create architectural plans using Revit. I also learned how to use 3D-printers and being confident in working with decimals and so much more. What I loved most about attending OCVTS was the company of excellent teachers, classmates and work environment that helped me to stay inspired, ignited my passion and talents, as well as expanding my mind-set to be open to new opportunities.

Today, I am so excited to report that I am employed at a professional land surveying company, Clearpoint Services, LLC. I am a CAD operator where I create outbound surveys as well as drafting data collected in the field. I was able to apply all of the teachings from OCVTS into my position. To current students, I do have a piece of advice I would like to pass on. Always take school serious, take advantage of all the opportunities that OCVTS has to offer. Also, try to find a job that allows you to expand your knowledge and encourages you to grow & learn new things every day. As for me, I hope to continue working and growing at Clearpoint Services, LLC. and learning from all of my team members here.

Al Boettger, a Land Surveyor who works closely with Romario stated, "He is an exceptional worker who is always punctual and eager to learn and grow his knowledge in the industry. When told something, Romario is able to retain it and complete the task assigned to him. Not only is Romario smart and has outstanding work ethic, he has never missed a day of work. OCVTS has given Romario the correct tools and knowledge to be successful here at Clearpoint Services, LLC. He makes our team want to go back to OCVTS in hopes there are others just like him. On a personal note, I would say that Clearpoint Services, LLC has given me the option to maintain balance at home as well as continuing doing what I love."

President/Owner of Clearpoint Services, LLC, Yanky Braunstein nominated Romerio as a success story. He wanted to share some words of wisdom. "As a business owner, the best advice I can give is to always build strong relationships with your clients, be honest, make sure your employees are all working as a team and helping your company grow while doing so. I started Clearpoint Services, LLC in 2005 from the ground up. I am a very happy and successful business owner not because of me, but because I work alongside with all of my employees and make sure any questions they have are answered. I promote nothing but the best when it comes to work ethic and making sure our services are always provided in a timely manner, accurate and qualitative. Work hard, find ways to motivate yourself and always complete the goals you set for yourself."

Romario (pictured in photo) loves his technical job and applying his AutoCAD skills at Clearpoint Services, LLC. When asked for a comment about Romario's success, Kirk Goebel, teacher of the Pre-Engineering Program at OCVTS, smiled and said, "I am so proud of Romario and truly happy for him!"

Working in the Field

Student's Name: Angela Downes

OCVTS Program: Culinary Arts

Instructor: Dennis Melia

Employer: Perlmutter Family Shop Rite, Manahawkin, NJ

Class of: 2011

Center: Brick

High School: Pinelands Regional

Angela's story: Perlmutter Family Shop Rite is one of the largest privately owned businesses in Ocean County with over 2000 employees. They have been a member of the OCVTS "education family" since 1998. OCVTS is grateful to the Shop Rite management and staff for their assistance in preparing our students for work by providing them with opportunities... opportunities to learn...opportunities to work...opportunities to succeed.

Angela Downes is one of these success stories. When asked to share comments about the training she received at OCVTS, it immediately generated a smile on her face. Employed in the bakery department at the Manahawkin Shop Rite, Angela Downes remarked, "I have been working here for over five years. I enjoy my job and all of the people I worked with in the bakery department. I especially like talking to the customers and taking their orders. The Culinary Arts Program at OCVTS definitely prepared me to be successful working in a busy bakery department. Although, I must confess...I still miss everyone at OCVTS!"

Manager of the Shop Rite's bakery department, Bill Kelly was pleased to say, "Angela began her work experience in our bakery department in 2011, as a participant in the OCVTS' Work-Based Learning Program. She did well and we hired her. Angela is a mature, reliable, organized worker that has learned all of Shop Rite's bakery procedures, food safety rules and Best Practices. I have complete confidence in Angela, and I know that in the early morning when I come to work, Angela will have completed her assigned nightly duties and the bakery is ready to start the day baking."

Annie Sayers, the Transition Specialist at OCVTS, was happy to nominate Angela as one of her successes for the wonderful job she is doing working in the bakery at Shop Rite beginning her sixth year. You go girl!

For Angela, working in Shop Rite's busy bakery department is a labor of love!

Working in the Field

Student's Name: Fawn Creutzinger

OCVTS Program: Center for Culinary Arts

Instructors: Chef Jason Crispin and Chef Ian Smith

Employer: Sally's Seafood (formerly Ahearn's Seafood), Waretown, NJ

Class of: 2018

Center: Cuisine on the Green

In Fawn's own words: I have always had a love of cooking and decided late in life to change careers. The accelerated program was perfect for my timeline and goals. Working for Sally's Seafood, a small business that is family run, allows me to use my creativity to introduce new items. I enjoy being part of a small team dedicated to fresh food and great customer service. Having just completed the accelerated culinary program at OCVTS, I do have some advice to share with the current culinary students. Give 100% of yourself to ensure you succeed in the program. Take advantage of all volunteer opportunities to gain experience in your field. Volunteering is a great networking tool to interact with potential employers. Take full advantage of the knowledge and experience of the instructors, Chef Ian and Chef Jay. Enjoy your time there before you know it, it will be graduation day!

The folks at Sally's Seafood in Waretown stated, "Fawn has from day one, been a part of the family fabric here. She has brought us new and exciting items, as well as a fresh look at all our processes and offerings."

"Fawn had stated Culinary Arts had always been a passion of hers; however, she never had the opportunity to work in the field. Fawn worked in retail for years but when she found herself laid off, she knew it was the perfect time to start the career she always wanted. Fawn was always smiling and happy to talk about her training at OCVTS, you could tell she was very passionate about what she was doing. She had perfect attendance in school, and once she started her internship, she continued to excel. The intern supervisor reported that Fawn was an indispensable asset to their kitchen. It was only fitting they decided to keep her fulltime." This success story submitted by Kali Rorke, Employment Counselor at the PIC Office, Toms River.

Fawn, Assistant Manager at Sally's Seafood, gladly shares photos of some of their delicious seafood delights!

Working in the Field

Student: Grace Hernandez

Class of: 2014

OCVTS Program: Center for Culinary Arts

Center: Cuisine on the Green

Instructors: Chef Ian Smith and Chef Jason Crispin

Employer: Gordon Ramsay Pub and Grill, Caesars, Atlantic City, NJ

Website : gordonramsaypubandgrill.com

In Grace's own words... Cuisine on the Green helped prepare me for my culinary career at Gordon Ramsay Pub and Grill by introducing me to the back of the kitchen and how it runs. From working the line to prepping large quantities of food and catering events outside of school, I learned it all. Chef Ian is extremely knowledgeable about food, the process of ordering it, storing it, and, of course, preparing it. Being in a school setting, I was able to learn without the fear of making mistakes or being overwhelmed all at once. I felt very comfortable which helped me be a better student. Chef Ian is very patient with the students, which is needed because we are just beginners. I learned knife skills, measuring, temperatures, kitchen language, and because it is an actual restaurant, I was able to participate in events and dinners. I was taught the do's and don'ts needed to be safe around larger equipment and how to work around others as a team. I am grateful for my experience at Cuisine on the Green and I hope others can utilize this school as a stepping stone for entering the culinary field as I did. Thank you, OCVTS!

After reading the comments Grace shared, it is easy to see why Chef Ian beamed with pride when he sent this email to the OCVTS staff. "I am happy to report that Grace Hernandez, a November graduate at the Ocean County Center for Culinary Arts, was just hired at Gordon Ramsay's new Atlantic City restaurant at Caesars. Grace, who was the outstanding student of her class, beat out more than 800 applicants for her position at Gordon Ramsay Pub and Grill."

Both Chef Ian and Chef Jason concur that, "Grace has a multifaceted approach to cooking combining classic and old world methods and the ability to adapt them for contemporary presentations. She has a high level of standards and expectations for the dishes she prepares. Grace has a high level of patience, which allows her not to rush and influence the quality of her food. We are so proud of her."

Grace proudly shows off her OCVTS Certificate.

Working in the Field

Student's Name: Pat Reed

OCVTS Program: Collision Repair

Instructors: Mike Lundin and George (Buck) Hurley

Employer: All American Ford, Old Bridge, NJ

Class of: 2008

Center: Jackson

High School: Jackson Memorial

In Pat's own words: This is easy. I wanted to learn more about collision repair. OCVTS prepared me by giving me more of an idea of what it was like to work in the field. Like many of the OCVTS students, upon graduation I continued my education by attending Ocean County College for Business Management. Attending OCVTS and OCC was a winning combination for me. Collision repair skills, computer skills, people skills and management skills are all needed to be a good Auto Body Service Manager.

As the Auto Body Shop Service Manager at All American Ford, I can honestly say the best feeling is being able to help a customer. They come into the shop upset that they have been involved in an accident, but after the repair is finished, they leave happy.

Some "Helpful Hints" that I would like to share with the current students Collision Repair and Auto Body/Welding programs is be prepared to work hard. Take all the training classes available to you. Lastly, listen to what the older guys in the shop have to say!

Mike Lundin stated, "I had the pleasure of being Patrick's instructor for EO Auto Body/Welding. Pat showed an immediate interest and ability in the shop. His next step was the Collision Repair class, where he also thrived and did very well. Pat always stayed in touch with me and kept me aware of where he was working and what he was up to. He has worked in the collision repair industry successfully since he graduated from vocational school ten years ago. It is with great pride that I share his story and take a little credit for his success."

Pat Reed, Auto Body Service Manager at All American Ford, working hard to make people happy.

Working in the Field

Student's Name: Tyler Milleman

OCVTS Program: Cosmetology

Instructor: Shari DeGregorio

Employer: Salon Solutions, Toms River, NJ

Class of: 2018

Center: Jackson

High School: Jackson Liberty

Website: salonsolutionsnj.com

In Tyler's own words: Decisions, decisions. I decided to choose OCVTS because of its well-known cosmetology program. This two-year program prepared me to take and pass my state board exams. Now, I can proudly say that I am a licensed cosmetologist. I will continue seeking out specialty trainings in my field because I love hair!

I look forward to going to work every day at Salon Solutions in Toms River. Everyone in the salon is terrific and I am learning so much. My employers are great. The tips help too!

Ocean County Vocational Technical School will train you to be as good as, if not better than, any other paid technical school. Not every career requires a college education, so do not let people tell you that it is not enough to just attend OCVTS, it is. I was employed in my field before I even walked through the doors at graduation. My sincere thanks to Ms. DeGregorio and everyone at the Jackson Center who made my experience there a fantastic one.

"Tyler is our Assistant in Training who is a recent graduate and has recently joined our team. Every day under the supervision of our senior stylists and owner, Tyler's skills are constantly being challenged, tested, and improved. He is excelling in every phase of Cut, Color, Partial and Full Highlights and Facial Waxing," stated on the Salon Solutions website.

Salon Solutions' Assistant in Training, Tyler Milleman

Shari DeGregorio, Cosmetology Instructor, (photo on right) had many reasons in nominating Tyler Milleman as a success story. He was her Outstanding Student of the Year at graduation. He already is working in a salon, motivated to continue to learn and truly loves what he is doing!

Sharing Success Stories

Working in the Field

Student's Name: Jasmine Heacock

Program: Dental Assisting

Instructor: Roxanne Beers

Employer: Cedar Creek Dental, Bayville, NJ

Class of: 2011

Center: Toms River

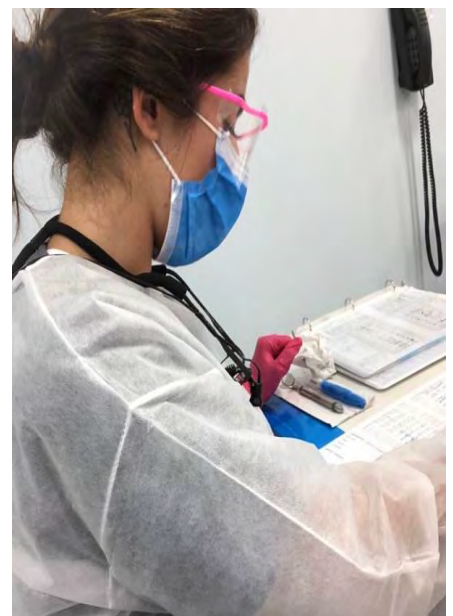

Post-Secondary: OCC & Rowan University

In Jasmine's own words: After high school, I chose OCVTS as a post-secondary student because I saw the opportunities the programs offered my family and friends in other trades. As for me, I was always interested in dentistry as a career path, which is why I enrolled in the Dental Assisting program. While in the program, I worked hard, received good grades and became interested in dental hygiene as a possible career. I took advantage of one of the opportunities that the Dental Assisting program offered and became a member of HOSA (Health Occupation Students of America.) One of the highlights was competing in the Dental Assisting Competition at Gloucester County and coming in first place! This was an exciting experience! Attending OCVTS has prepared me for work in a professional setting. Not only was I thoroughly trained with chairside skills but I also received my dental radiology license!

To pursue a career in dental hygiene, I had to work and pay for classes in the meantime. I secured a position as a dental assistant, where I worked full time while taking my pre-requisite courses at Ocean County College (OCC). I enrolled in OCC and graduated with my Associate's Degree in Applied Science. I continued my education at Rowan University at Burlington County College in their Dental Hygiene program. For two years I was studying and practicing dental hygiene at the RCBC dental hygiene clinic. I did it!

What I love most about my job as a dental hygienist at Cedar Creek Dental is teaching patients the importance of oral health, and that coming to the dentist does not have to be a scary visit. Many people neglect the fact that their mouth is a part of their overall health, and that is where dental hygiene comes into play. I genuinely enjoy taking my time to thoroughly explain the variety of home care instructions for each patient.

Never in a million years did I think I would go to college. School and books never came easy to me, but I wanted to be a dental hygienist and I was willing to do anything to get there. I smile every day going to work! "Jasmine was dedicated to dentistry from the time she first stepped into my class. She took one day at a time, never gave up and is now living her dream," Roxanne Beers.

(left to right) Roxanne Beers and Jasmine reunite at an office visit. Jasmine proudly poses at graduation and busy at work.

Working in the Field

Student's Name: Ryan Johnson
OCVTS Program: Quick Print Graphics
Instructor: Greg Sarles
Employer: Ann Coen Photography

Class of: 2013
Center: Brick
Home School: Southern Regional

In Ryan's own words: My reason for choosing vocational school was simple, I had friends that went to OCVTS and they had a good experience. So... I figured I would give it a shot after I graduated. As a kid, I went to high school not knowing what I wanted to do. I had no college plans or any serious jobs lined up. I found what I loved to do, namely, photography and I decided to stick with it. Now, I do it fulltime and I am making a living doing it. Everyone

that I work with at Ann Coen Photography is like family to me. So when I work, it never feels like work. It feels like hanging out with my friends and creating new things together. I also love that every photo shoot is somewhere new.

Ryan came to me five years ago with the desire to become a professional photographer. Through his internship, he has worked on a series of jobs ranging from weddings to food styling, family portraits and company headshots. He is now one of my full time editors and is hired out to do a number of jobs on his own. His photography and his work ethic continues to grow and I look forward to seeing where he can take his career! – Ann Coen

Many of Ryan's beautiful color photographs can be seen hanging on the dining room walls throughout the Cuisine on the Green. This restaurant is the home of OCVTS' Accelerated Culinary Arts Program located at the Atlantis Golf Club in Little Egg Harbor. Ryan's photographs are a real crowd pleaser along with the delicious meals served there. The numerous patrons' comments received by the staff at the Cuisine on the Green, have qualified Ryan Johnson, photographer, as an OCVTS success story.

Just a sampling of Ryan's photography. Check out his website at www.ryanjohnsonphotos.com.

Sharing Success Stories

Working in the Field

Student's Name: Trevor Finch
OCVTS Program: Welding
Instructor: James Mansfield
Employer: Local 9 Pipefitters Union

Class of: 2013
Center: Toms River
High School: Lacey Township

In Trevor's own words: I chose the Welding Program because I always knew that college was not the best fit for me. I am more of a "hands-on" and "learn by doing" type of person. OCVTS and Mr. Mansfield in particular, helped me by teaching me the important fundamentals and etiquette of the welding industry. After vocational school, I attended trade school at the Local 9 Training Center for five years as an apprentice in order to become a pipefitting journeyman.

Punctuality, determination, and a willingness to learn are the most important attributes in becoming a Union pipefitter. I spent hundreds of hours of my own personal time at the training center learning to weld. It was difficult to do, along with working full time, and going to school but that separated me from the others. The most crucial advice I can give to students would be to set goals for yourself to work towards every day. No matter what career path you chose in life, you will need to work hard to be successful. For me, I knew exactly what I wanted to do with in life. There are many reasons why I enjoy going to work but the most important reason is being paid to do what I love!

Trevor Finch is a former student of mine who was enrolled in the daytime welding program at OCVTS for two years. Trevor did well in the welding program, and he even earned some certifications before completing the class. He applied to Local 9 Plumber and Pipefitters Union and was accepted into the local union and started working that September. I cannot believe five years have passed since Trevor became a journeyman plumber pipefitter. To see Trevor go from a high school student to one of the top welders in his field in just five years is amazing! It is my pleasure to write these comments about Trevor and to let everyone know how much he has accomplished by staying focused in the welding field. He has a wonderful career ahead of him. On behalf of everyone at OCVTS, I would like to congratulate Trevor on his success!

(Pictured) Trevor proudly poses in front of his home, performing his welding skills, a sample of his work and job site.

This booklet is dedicated to the late
William Hoey, Jr. Superintendent of OCVTS
for his lifetime of outstanding service to
Vocational Education.
