Design and Visual Communication

Emphasizes preparation for both employment and continuing education at a post-secondary institution. Students select from eleven ten-week courses consisting of conventional and digital skills required in various visual art and communication careers.

Multimedia: Emphasizes the creation of digital art for print, video and electronic media. This component of the program includes courses in: Graphic Design, 2D Animation, Web Design, and Video Production, as well as classes in the Adobe Certified Associate for Illustrator and Premier.

Digital Reproduction: Emphasizes the use of current technologies in both conventional printing and digital reproduction. This component of the program includes courses in: Design and Reproduction, Screen Printing, and Production Graphics, as well as classes in the Adobe Certified Associate for InDesign.

Photography: Covers the techniques of traditional and digital photography highlighting skills required in advertising, portraiture, multimedia and fine art. Includes courses in: Digital Photography, Multimedia Photography, Product Photography, and Studio Lighting, as well as classes in the Adobe Certified Associate for PhotoShop.
